

MPPS RECYCLING STATION

Maylands Peninsula Primary School is proud to have a Recycling Station, which allows the school community to recycle a variety of items which would usually end up in landfill. Our intention is to raise our students' awareness of environmental issues, whilst empowering them to make a difference and build good habits of caring for their environment. Since commencing in June 2019, more than 120kg has been diverted from landfill. Not only does this help our environment, but it also assists us in raising funds, as the school receives 10 cents for each Containers for Change item (e.g. cans and bottles) and many of the other recyclables earn 2 cents per item through the Terracycle recycling schemes – so please consider collecting on behalf of family and friends too.

Please refer to this sheet for current details on what items can and cannot be recycled.

How does the Recycling Station work?

1. Keep this sheet handy at home to check what items can be recycled.
2. **All items must be clean, dry, fully used and as empty as possible.**
3. Place empty items in the appropriate bin for each recycling program at the school. Each bin is colour coded as per this information sheet.

The recycling station for most items is located just outside the library near Middle Block for drop offs during regular school hours.

- **Printer cartridges must go to the office.**
 - **Containers for Change (e.g. cans and bottles) must go to the large blue bin which is outside the caged enclosure behind JB Block.**
4. The items will be sent for recycling (with the majority of the schemes being run through Terracycle, see www.terracycle.com/en-AU/ for more information).

CONTAINERS FOR CHANGE

We only accept beverage containers that show the 10 cent refund sign

- ✓ Please make sure containers are rinsed and dry
- ✗ Do not crush cans or remove labels
